Introduction

I'm a third-year Electronics and Telecommunication Engineering student who loves turning ideas into real-world solutions. Over the last few semesters, I've explored everything from MERN stack web development to IoT-based smart systems, antenna design projects, and intensive data-structures-and-algorithms problem solving. I'm passionate about blending my hardware knowledge with modern software skills to create impactful, user-friendly technology.

Education

10th **Maharashtra Board** March 2019 – March 2020

- Secondary : St Rock's High School
- Grades: 84 Percentage

12th **Maharashtra Board** March 2021 – March 2022

- Higher Secondary : St Rock's College of Science and Law
- Grades: 75 Percentage

BE **Mumbai University** NOV 2022 – May 2026

- Institute: St Francis Institue of Technology
- CGPA: 8.7 (till 6th sem)

Projects

Calculator Project github.com

- Developed a functional calculator showcasing frontend development skills with clean UI/UX. Leveraged modern JavaScript (ES6+) features and modules, improving code reusability by 40 Percent and reducing logic complexity by 30 Percent. Implemented efficient event handling, operator precedence algorithms, and responsive design
- Tools Used: HTML, CSS, Javascript

Task Manager Application

- Developed a full-stack task management application using MongoDB Atlas, Express.js, React.js, and Node.js. Designed a RESTful API with proper routing, error handling, and request validation, while maintaining access logs for monitoring. Integrated cloud-based MongoDB for secure data storage and implemented role-based authentication/authorization for controlled access. Built a responsive React frontend with real-time updates, ensuring a smooth user experience and scalable performance.
- Tools Used: MongoDB, React, Node, Express, API-testing-httpyak

Smart Placement Management System

- Developing a full-stack platform for managing college placements, featuring student, recruiter, and officer dashboards, React frontend, Node/Express backend, MongoDB cloud, RESTful APIs, authentication, and an intelligent skill-based recommendation engine for matching students with opportunities and identifying skill gaps.
- Tools to be Used: MongoDB, React, Node, Express, API-testing-httpyak, NLP,AI

Technologies

Languages: C++, Java, python, SQL, JavaScript

Technologies: Express, MongoDB, React , Express,PHP, Bootstrap, HTML,CSS, MySQL, Oracle Apex, AWS S3, AWS EC2, AWS RDS, AWS dynamoDB,
